Original Broadcast/Publish Date:	04/05/2021
Runtime:	00:01:00
Main Asset File Size:	0.63 GB
Short Description:	Lower rates of cancer screenings during the pandemic have effects on cancer diagnoses.
Long Description:	Rates of cancer screening tests like mammograms and colonoscopies plummeted during the pandemic but now more people are signing up for screenings. As a result of these delayed tests, cancers are being diagnosed in more advanced stages. But experts say isn't necessarily cause for alarm.
